

More problems for the Chemical Tanker JABRAYIL DOVLATZADEH #IMO9383613

Oil leaks were reported during its stay at the Yalova anchorage Turkey 16.05.22

*'During a routine surveillance flight by Turkey's Environmental Protection and Control Department in the Gulf of Izmit, it was determined that tankship **Jabrayil Dovlatzadeh** (IMO 9383613) had polluted the sea off the coast of the Yalova shipyards on May 16th. The situation was reported to the Coast Guard 17 Command. An action has been initiated regarding the ship polluting the sea.'*

Insurance Marine News

Jabrayil Dovlatzadeh now has a new, higher predictive Red Risk Rating of 60%, up another 5% since last vessel risk rating on the 03.11.20.

IMRRA recommends immediate action to control the Jabrayil Dovlatzadeh hazard potential for all parties.

How did the Jabrayil Dovlatzadeh become a vessel requiring immediate action to control the vessel hazard? Why is it a high risk for severe incidents/casualties?

The past is the key to the future! Below is a quick summary on how it got to its first Red Risk Rating.

Seven of the vessels operated by the PALMALI SHIPPING & AGENCY have only ever been allocated a red risk rating by IMRRA's analysts. Indeed, the whole fleet is Red risk rated averaging 54%. Only three of the 10 vessels it operates have a lower risk Amber rating. For all vessels Amber Risk rated, a planned approach to vessel risk management is required.

The company is known for multiple contraventions of the Maritime Labour Convention 2006, primarily by unpaid salaries and abandoning the ships & crew. An ongoing issue flagging up potential PSC detentions for serial non-compliance. More importantly,

PSC deficiencies: The **JABRAYIL DOVLATZADEH** has been subject to a number of deficiencies, and three detentions:

- 2014 by PSC authorities of Egypt
- 2018 by PSC authorities of Greece
- 2019 by PSC authorities of Romania

Both the P&I Club and Class Society are unknown, and no International Transport Workers' Federation agreement. What is there to like? Possibly the change to the Liberian flag?
